

# Hinges

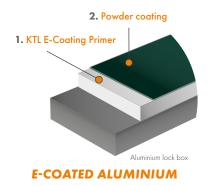

Hinges support the weight of the gate and ensure it opens and closes smoothly. Because of this heavy task, our hinges are hot-dip galvanized or made of stainless steel. Thanks to our wide range we can offer a solution for every situation. Our patented 4D hinge is a top-of-the-line innovation which is adjustable in 4 dimensions (height/depth/alignment/left or right turning).

- **113** Hinges for industrial and ornamental gates
- **136** Hinges for small gates

Materials and surface treatments fit for a long, care-free outdoor use, is a basic requirement for our products. Therefore, Locinox only uses stainless steel and non-ferro metals as raw material. For the surface treatment we choose for hot-dip galvanization or chroming, if possible. Our aluminium lock boxes are profoundly tested against wear by salt and never fail thanks to the applied multilayer, high performing coatings.

**POWDER COATING** 

**HOT-DIP GALVANIZATION** 

Even though our products meet most important safety standards, a wrongful assembly could result in hazardous situations. Therefore we like to inform you about the parameters to mind during assembly.

#### **CORRECT INFORMATION**

A team of engineers and experienced product experts are ready to assist you. Every product is supplied with a clear manual which guides you through the steps for a correct and safe installation. For more complex products, a 3D installation video is available on our website.

#### **MAXIMUM GATE WEIGHT**

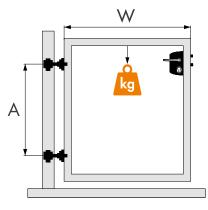

We always mention the maximum gate weight which is allowed for our hinges. This weight is still under the maximum load. Locinox applies safety factor 3,5 which means that they can bear up to 3,5 times the maximally allowed gate weight without endangering safety. The maximum gate weights and the safety factor are only applicable for gates that comply with the following formula.

Please note:

- Maximum gate width: 4 m
- Additional limitations can be defined on configuration level
- Please contact Locinox in case of specific questions

European norm EN 12604 prescribes that every gate should be prevented from falling and in case of faillure of a hinge the gate should be held not further than 300

mm from the turning point of that hinge. This can be done by fitting the U-Safe or B-Safe gate safety cable (see p 190) or a 3rd hinge.

**SAFETY FACTOR 3,5**  $\frac{W}{\Delta} \leq 2$ A = Distance between the hinges W = Gate width

Hinges

## 180° hinge set for ascending slopes

EXCENTRO-

This hinge is the perfect solution for sloped driveways. The hinge opens in an upward movement inwards, allowing a perfect entry and exit on even the steepest slopes (from 2% up to 35%). Use with the Rhino hydraulic gate closer is highly recommended for a controlled closing. Modular for gates with a Locinox GBMU4D-M16 preparation.

#### Specifications

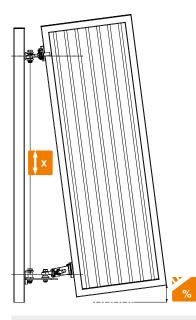

- ✓ Hot-dip galvanized hinge with stainless steel components
- Recommended with Rhino hydraulic gate closer for a controlled closing
- Adjustable for slopes from 2 up to 35% (depending on distance between hinges)
- ✓ For left & right turning gates
- Compatible with KLAUW gate claw and 1001 U U-shaped ear plate

# 180° Bolt-on 4D adjustable hinge

BOLTONHD-4D- (Patented)

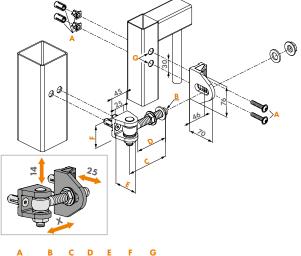

180° hinge which can quickly be mounted without any welding being required. It offers all advantages of the GBMU4D range: vandal-proof, adjustment of height, depth and distance between gate and post, left/right interchangeable so it can be used for both left and right turning gates. BOLTONHD-4D is available in M12 and M16, and always in 2 versions: one with Quick-Fix on both sides and one with Quick-Fix on the post, and on gate side a bolt through fixing for gate frames from 40 to 60 mm.

Color options

#### Specifications

- ✓ Easy to fix with Quick-Fix or bolt through fixing
- ✓ Vandal-proof eyebolt & crossbolt
- ✓ 180° opening
- ✓ Hot-dip galvanized eyebolt and crossbolt

# Gate wing standardization

With Locinox you can easily standardize and stock only one type of gate wing which can be used on left- or right turning gates or on double wing gates. Our extensive product range allows you to use the same wing for the lock and the keep. A counterbox ensures a uniform and aesthetic look. The orientation of the GRIP of our GBMU4D hinge makes it possible to determine during installation whether the wing will be used for left or right turning.

100% modular

# Sales support tools

Convince your clients of the Locinox quality. We developed several gate displays and demo cases of our best selling products. Every featured Locinox product is full-scale and functioning just like in real-life.

These handy sales support tools perfectly claim what Locinox is standing for: exceptional quality, good value, extreme durability, user friendly comfort, easy installation, and much more. Let the lightweight gate displays and complete demo cases be your closest ally during sales visits or showcase them in your showroom. They will be an eyecatcher and make your sales talks much easier, believe us. **196** G
